## WHO ARE WE?

Geographically located in an important industrial axis of Santiago, we are a space for contemporary art with unique architectural and urban characteristics that **accompanies, supports and exhibits** diverse manifestations in the same place: visual arts, music, film and performing arts.

Founded in 2001 in what were for decades the warehouses of the State Supply Department on Matucana street, **our job is to facilitate creation and deliver high quality experiences and authorial freedom to audiences.**

A wide range of **emerging and established creators** come together in the Cultural Center's physical and digital stages to reflect with his work on the issues of the current global system. Civil society and the different worlds of the cultural field meet, connect and become present in a **national referent with over 20 years of history.**

Matucana 100 creates a unique place for contemporary art in Chile.
